

Data Intake Report

Name: Deployment on Flask

Report date: October 30th, 2024

Internship Batch: LISUM38

Version:1.0

Data intake by: Bilgan Kiris

Data intake reviewer: Data Glacier

Data storage location: https://scikit-learn.org/1.5/datasets/toy_dataset.html

Tabular data details:

Total number of observations	150
Total number of files	1
Total number of features	5
Base format of the file	.csv
Size of the data	0.001 MB

Note: Replicate same table with file name if you have more than one file.

Proposed Approach:

- Checking for duplicate rows in the dataset by examining all feature columns (sepal length, sepal width, petal length, petal width, and species) to identify any duplicates.
- All records are assumed to be complete, as missing values are uncommon in standard datasets from scikit datasets.
